Company Profile

The Mayfield Clinic of Cincinnati, Ohio, has treated hundreds of thousands of patients since its establishment in 1937 by Frank H. Mayfield, MD. Internationally recognized as a leader in neurological surgery, Mayfield has forged a rich and lasting heritage through technical innovation, research, and a commitment to patient care. As part of its historical role in the training of young physicians, Mayfield works hand-in-hand with the University of Cincinnati Department of Neurosurgery to oversee faculty members, resident training and clinical fellowships.

University of Cincinnati Department of Neurosurgery

The UC Department of Neurosurgery, which represents Mayfield's academic arm, oversees the neurosurgical residency and clinical fellowship programs, which take place concurrently at the University Hospital, Good Samaritan Hospital, Christ Hospital, Cincinnati Children's Hospital Medical Center, and the Veterans Affairs Medical Center.

Mayfield Spine Institute

The Mayfield Spine Institute is the largest and most experienced network of spine specialists in the Midwest. Our interdisciplinary team includes board-certified specialists in neurosurgery and physical medicine and rehabilitation, as well as licensed professionals in physical therapy.

Mayfield Chiari Center

The Mayfield Chiari Center offers expert diagnosis and treatment of adult and adolescent patients with Chiari malformation and syringomyelia. Our caring, multidisciplinary team is supported by several superb hospitals in the Greater Cincinnati / Northern Kentucky area, and we are a destination for regional, national and international referrals.

Mayfield Imaging Center

Located in the Mayfield Clinic office in Crestview Hills, Kentucky, the Mayfield Imaging Center features state-of-the-art magnetic resonance imaging (MRI) technology, which provides the most advanced, high-field images possible.

Precision Radiotherapy Center

A partnership of the Mayfield Clinic and University Radiation Oncology, Precision Radiotherapy is the region's first center to offer high-precision radiotherapy and radiosurgery for tumors and other abnormalities both inside and outside the brain. The center is located in West Chester, Ohio, just north of Cincinnati.

Spine Surgery Center

A partnership of The Christ Hospital, United Surgical Partners International (USPI) and the Mayfield Clinic, the Spine Surgery Center offers same-day surgery and procedures for patients whose spine problems can be treated without an overnight stay. The state-of-the-art center supports three operating rooms and a pain procedure suite in a comfortable, patient-focused environment.

Priority Consult

Priority Consult is a healthcare solutions company developed by the Mayfield Clinic & Spine Institute that designs specialized software applications for more effective patient management using patient-focused, nurse navigation models. Our solutions include Priority Consult for Spine Practices, Priority Consult for Spine Centers and Priority Consult Breast Care.

University of Cincinnati Neuroscience Institute

The UC Neuroscience Institute is an internationally recognized neuroscience center of excellence based at the University Hospital in Cincinnati. A collaboration among the Mayfield Clinic, the University Hospital, and other neuroscience specialists of the University of Cincinnati College of Medicine, The UC Neuroscience Institute offers comprehensive, compassionate, and specialized care for patients with diseases and disorders of the brain and nervous system.

Mission

The mission of the Mayfield Clinic is to provide excellent and compassionate clinical care, innovative service, and advanced education and research in the neurosciences.

Values

Mayfield physicians and associates commit to this mission through several core values. Through these values, Mayfield ensures that every patient, referring physician, or visitor is treated in the manner that epitomized the life of our founder, Dr. Frank H. Mayfield.

- **Integrity:** We commit to professional and ethical behavior toward every individual.
- **Respect:** We recognize the worth, quality, and importance of every individual and regard them with consideration and appreciation.
- **Communication:** We are honest, open, clear, timely, and appropriate in our communication with every individual.
- **Collaboration:** We recognize and value the input of every individual through teamwork, cooperation, and empowerment.
- **Diversity:** We value the diverse backgrounds, skills, opinions, and contributions of every individual.
- **Celebration:** We commit to celebrate individual and collective successes.
- **Continuous Improvement:** We commit to continuous quality improvement.
- **Permanence:** We commit to assure the financial strength and human resource necessary to preserve the mission of the Mayfield Clinic.

Brain hemorrhage	Spinal cord injury
Moyamoya disease	Carpal tunnel
Head injury	Epilepsy
Hydrocephalus	Parkinson's disease
Chiari, syringomyelia	Essential tremor
Facial pain	

Mayfield Facts

- The Mayfield Clinic is one of the largest neurosurgical practices in the world.
- Mayfield physicians have held leadership positions in the American Association of Neurological Surgeons, Congress of Neurological Surgeons, Ohio State Neurosurgical Association, and more.
- Our physicians have pioneered advancements in neurosurgical instrumentation and technology, including the Mayfield Headrest, the Budde-Halo Retractor, the Mayfield Clip, and the Mayfield ACCISS image-guided surgery system.
- Mayfield has 21 neurosurgeons, six neuro-intensivists, an interventional neuroradiologist, a pain management specialist, six physical medicine & rehabilitation specialists, three nurse practitioners, and two clinical nurses.
- Approximately 20,000 patients visit us each year.
- Our patients come from more than 35 states and 13 countries in a typical year.
- Our surgeons perform over 5,000 surgical cases and nearly 14,000 surgical procedures each year.
- Mayfield has surgeons in every neurosurgical subspecialty.
- Through Priority Consult[®], our physicians review case histories of thousands of new spine patients each year. Nearly 80% of these patients recover without surgery.
